

If you have Microsoft Money, you do not have to go through the conversion that our Quicken users do.

Now Kinecta offers Direct Connect for Microsoft Money. You will connect to Kinecta through your Money software and download the file from there. There is no need to do a manual download from Kinecta's home banking site any longer.

This is a quicker and cleaner solution to the manual download process. Once you get past the initial direct connect download you will not experience duplicate transactions any more as you would with manual downloads and imports.

Please click the link below. This link takes you to Microsoft's Money Set Up Guide. You will see it titled "Getting Started with WoodGrove Direct and Microsoft Money 2005". Keep in mind that WoodGrove is a fictitious Financial Institution created for this guide. Simply replace WoodGrove with Kinecta Federal Credit Union when using the guide. Also this guide works for later Money versions as well.

Very Important

Make sure your software is freshly updated. Also take a backup before starting this process. This will ensure you will not lose any information if there is a problem while setting up Direct Connect.
